Press Release

Evonik prepares for listing In a first step, owners place shares with institutional investors

Essen, February 22, 2013. Evonik Industries AG is resuming its preparations for its planned listing in the Prime Standard of the Frankfurt Stock Exchange. The move is prompted by the improved capital market environment as well as investors' growing interest in the shares of successful companies. As part of these preparations, the owners of Evonik – RAG Foundation and funds advised by CVC Capital Partners – have placed a part of their shares with institutional investors in advance. Both owners have disposed of an equal amount of shares representing less than 10 per cent of the company in a private placement advised by MainFirst Bank AG.

The broadening of the shareholder base marks a first step towards the intended stock exchange listing. The new shareholders consist of selected German and international institutional investors. The parties agreed to maintain confidentiality on the purchase price, which is in line with the valuation of comparable European specialty chemicals groups and significantly exceeds the indicative prices from the listing originally planned in June 2012.

“For RAG Foundation, the sale of shares in Evonik has two advantages: We have achieved a good result while making further headway towards the planned listing of the company,” said Werner Müller, Chairman of RAG Foundation's Executive Board.

Christian Wildmoser, partner at CVC, added: “After four and a half years of close cooperation, CVC and RAG Foundation have used this private placement to open Evonik to responsible new investors. Interest was already very strong at the time of the planned listing in 2012, when market conditions in the end were too volatile. The private placement puts us in a more positive position towards achieving an intended stock exchange listing with less effort and makes us less dependent on what is a volatile market environment.”

Klaus Engel, Chairman of the Executive Board of Evonik, commented: “Investors' strong interest testifies to the success of our growth strategy. We look forward to continuing along this path together with the existing and the new shareholders.”

Broadening of shareholder base supports continuation of successful growth strategy

The management of Evonik has systematically positioned the company in the profitable, high-growth segment of specialty chemicals. Evonik is now one of the world's leading specialty chemicals companies and has a well-balanced portfolio. With over 80 percent of the company's sales generated through leading market positions, Evonik focuses on high-growth megatrends – notably health, nutrition, resource efficiency and globalization.

Not for release, publication or distribution in the United States, Australia, Canada or Japan.

Supported by a broader group of shareholders, Evonik will continue to pursue its distinct innovation and growth strategy and plans investments exceeding six billion euros between 2012 and 2016. A substantial amount of these funds will be dedicated to fast-growing emerging economies.

About RAG Foundation

RAG Foundation is a civil-law foundation established in 2007. Its purpose is to build up Foundation assets by 2018 in order to fund long-term liabilities in German coal mining from 2019 onwards. Under the Foundation's Statutes, this objective is to be achieved by means of an initial public offering of Evonik Industries AG.
